

## SECTIONAL OVERHEAD DOORS

### DESCRIPTION

Artisan sectional overhead doors are designed to provide an effective environmental barrier where energy conservation, practicality and aesthetic appearance are required.

### SPECIFICATION

Artisan sectional overhead doors are constructed from 610mm deep x 40mm thick composite panels manufactured using hot dipped zinc coated sheets bonded together using CFC free

foam providing the panel with a "U" value of 0.45w/m<sup>2</sup>k.

The top, bottom and side panels are fitted with rubber seals for weather protection and run in vertical and horizontal tracks.

The doors are counterbalanced using high tensile helical springs to ensure smooth running of the door and therefore require minimal effort.

### APPLICATIONS

All our sectional doors are purpose made to suit individual site dimensions and requirements. They are suitable for all types of industrial and commercial applications such as loading bays, industrial warehouses, storage buildings and commercial garages.

### PANEL OPTIONS/COLOURS

Colours are available in either plastisol finish or polyester powder coat finish from standard BS/RAL colour range.

### TRACK OPTIONS

- Low headroom
  - Vertical lift
  - Standard lift
  - High lift

### OPERATION

- Manual operation
- Three phase electric operation
- Chain operation

### OPTIONAL EXTRAS

- Vision panels
- Integral doors
- Safety devices (electrical)

### ALSO AVAILABLE

- Fully glazed

## RAPID ROLL DOORS

### DESCRIPTION

Artisan rapid roll doors are designed to provide an effective barrier against draughts and temperature loss by maintaining room temperature whilst optimising traffic flow to frequently used openings and therefore improving working conditions.

### SPECIFICATION

Artisan rapid roll doors are constructed from either solid or clear PVC curtains c/w windbars, this provides a barrier against air and sound. The curtain runs in galvanised steel side guides c/w brush strips to minimise air leakage and can operate at speeds of upto 1m/second (depending on size of door). The door rolls neatly into a galvanised steel canopy at high level and is supplied c/w bottom rail safety edge and photo-electric safety beam to prevent unnecessary damage to the door.

### APPLICATIONS

All our rapid roll doors are purpose made to suit individual site dimensions and requirements. They are suitable for all types of commercial and industrial applications and can be installed internally or externally.

### OPERATION

- Standard push button
- Remote control
- Magnetic induction loop
- Motion radar detector
- Pull cord

### OPTIONAL EXTRAS

- Choice of curtain colours
- Polyester powder coat finish from standard BS/RAL colour range
- Self repairing curtains
- Knock out tabs
